If an individual has a current Asbestos Supervisor Certification, they may apply in the State of Delaware as a Project Monitor but they may be requested to take a one (1) or two (2) day Project Monitor course. However, the Asbestos Office must pre-approve this process.

If an individual has no asbestos abatement experience, they must take the five (5) day Supervisor course (first) in addition to the five (5) day Delaware Project Monitor course. The Asbestos Office must also pre-approve this process.

Individuals with extensive experience in other states may apply to be grandfathered. However, after review of the application, resumes, other courses taken in the asbestos field, and education, the Asbestos Office will determine if the individual is qualified under the grandfathering clause or if they must attend additional training before being issued a Project Monitor license.

Upon successful completion of the Delaware Project Monitor course, the applicant must apply to the Division of Facilities Management, Asbestos Section for their certification badge.

All new licensees must present in person, a valid Government issued Identification (i.e., Active Driver's License, Active DMV Identification card with photo, Active Work Visa ID with photo, Active Resident Alien ID with photo or Active Passport ID with photo) with this application.

ATTACH WITH APPLICATION:

1. Required application fee of \$50.00 (cash, money order, or company check only).
2. 1 Color Photograph for Badge (can also be sent electronically to asbestos-applications@delaware.gov)
3. Project Monitor Training Certification.

CERTIFICATION PERIOD IF GRANDFATHERED - 1 year from the date of the training course submitted.
